

## Repair Cherry Interior Wood Finish

Item Needed: \ Cherry W/S Stain  
220 Sand Paper  
M102-0452 Mohawk Satin top Coat *paint # 1015784*  
M102-0413 Mohawk Sealer *paint # 1015701*  
*Paint # 100906 Spray No Blush*

*M-10760*

### Light Blemish:

- 1 Sand blemish lightly until gone
- 2 Touch up with satin top coat until desired look

### Heavy Blemish:

- 1 Sand blemish until gone
- 2 Restain area that has been removed due to sanding blemish. Continue to stain until the color match is complete allow to dry for 10 minutes
- 3 Apply Mohawk Sealer, allow to dry for 20 minutes. Sand between coats apply as many as needed.
- 4 Apply Mohawk satin top coat until desired look

Some situations require all wood finish to be removed due to the blemish being too deep to blend back with existing wood finish. In this case, it's less time to start fresh
