For Pre-cut Units

(For Units marked 100S & 200S)

Hunter Marine Cut Sheet

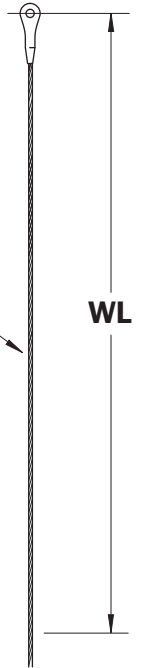

STEP 1

Forestay length has been marked with felt tip pen to the length given in the Forestay Lengths table. DO NOT CUT BEFORE FEEDING THROUGH ASSEMBLED EXTRUSIONS.

STEP 2

See luff extrusion chart below for number of extrusions required and the cut lengths of the upper luff extrusion and distance tube. The extrusion and distance tube have been pre-cut to the correct length and are packaged separately.

New forestay

FORESTAY LENGTHS		
Boat	Wire length (WL)	Finished length
Hunter 33	37' 7"	38' 2 1/2"
Hunter 41	51' 9 5/8"	52' 5 7/8"

THREE TYPES OF LUFF EXTRUSIONS REQUIRED

Boat	39 3/8 "luff extrusion	78 3/4 "luff extrusion	94 1/2 "luff extrusions
Hunter 33	1	1	4 *One extrusion is pre-cut to 38 " One distance tube is pre-cut to 30 1/8 "
Hunter 41	1	1	6 *One extrusion is pre-cut to 22 1/8 " One distance tube is pre-cut to 7 3/4 "

*Note: Pre-Cut extrusion is always the upper luff extrusion, you will not have left over extrusions.
