

- 1) Move Bimini bracket to lower location on arch as shown in diagram 1.
- 2) Drill 11/32 hole in Bimini rail 5" up from existing hole as shown in diagram 2.
- 3) Replace lower rail with new 31" rail that is proved as shown in diagram 3.
- 4) This will put the bimini height at approximate 86" from cockpit floor and approximately 7" above arch.
