

# MARLOW-HUNTER 31

The Marlow-Hunter 31 (MH31) has arrived in dealerships worldwide and showcases a technologically advanced design that reflects Marlow-Hunter's research and development prowess. Unlike traditional 31-foot sailboats, it features a beam of 11 feet 10 inches, giving it a roomy interior while retaining spirited performance.

The MH31 has a Henderson/Marlow designed hull with bow hollow and hard chine that is one of the most advanced hulls on the market. It allows the MH31 to deliver more performance and better handling. Its design rivals most 34-foot models for usable space. The hull is constructed with premium resins used

in conjunction with custom cut unidirectional fiberglass reinforced with DuPont™ Kevlar®, to form one of the toughest hulls on the seas. Marlow's use of Nida-Core coring, instead of balsa wood, makes its hulls impervious to water infiltration and rot. The hull and deck components are joined using the Mar-Guard™ fastening system, producing one of the strongest hull/deck joints in the industry. Capped with a polished stainless steel striker, the joint forms a durable rub rail, built to keep the MH31 looking good for years.

The interior features intelligent design and high-quality craftsmanship. It is constructed using the proprietary Mar-

Grid™ structural grid, giving a superior fit and finish. This eliminates potential sources for noise, hull stress, and damage. The MH31's galley showcases handcrafted cherry or teak woodwork, genuine Corian® countertops, and abundant natural lighting. Two staterooms, combined with a large vanity with separate shower, offer ease of use generally seen in larger sailing yachts.
